# First Year Success

## DERWA Recycled Water Production in July 2021 with Project Online

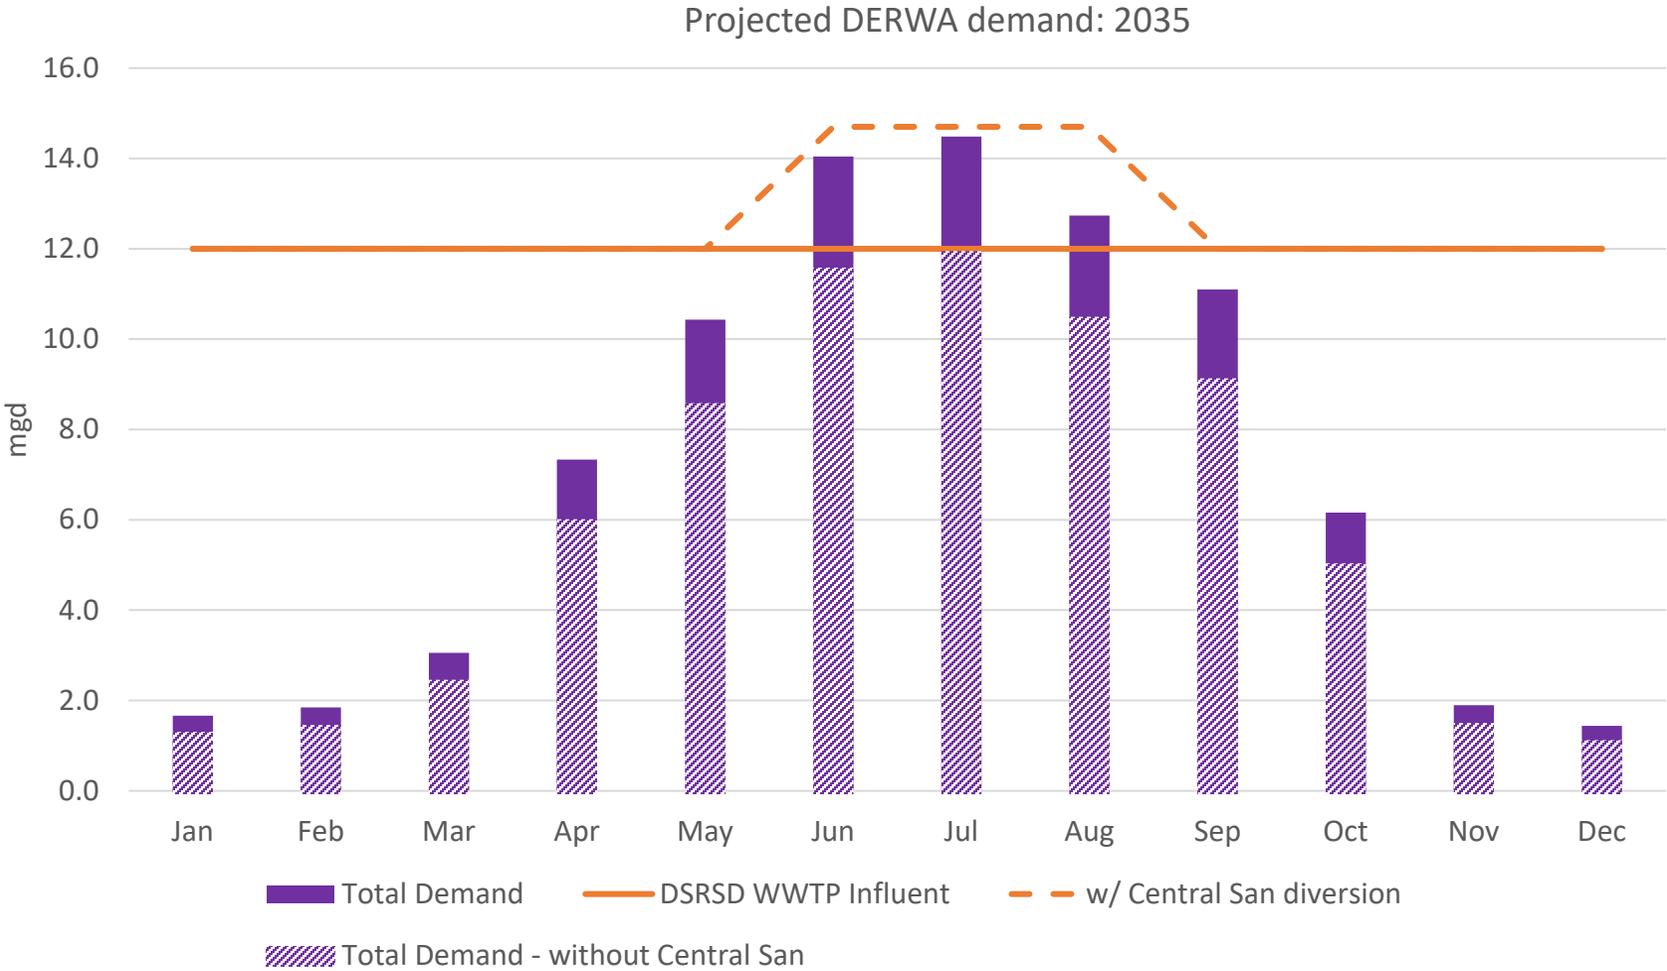

# Long-term Agreement with Central San Multiple Benefits

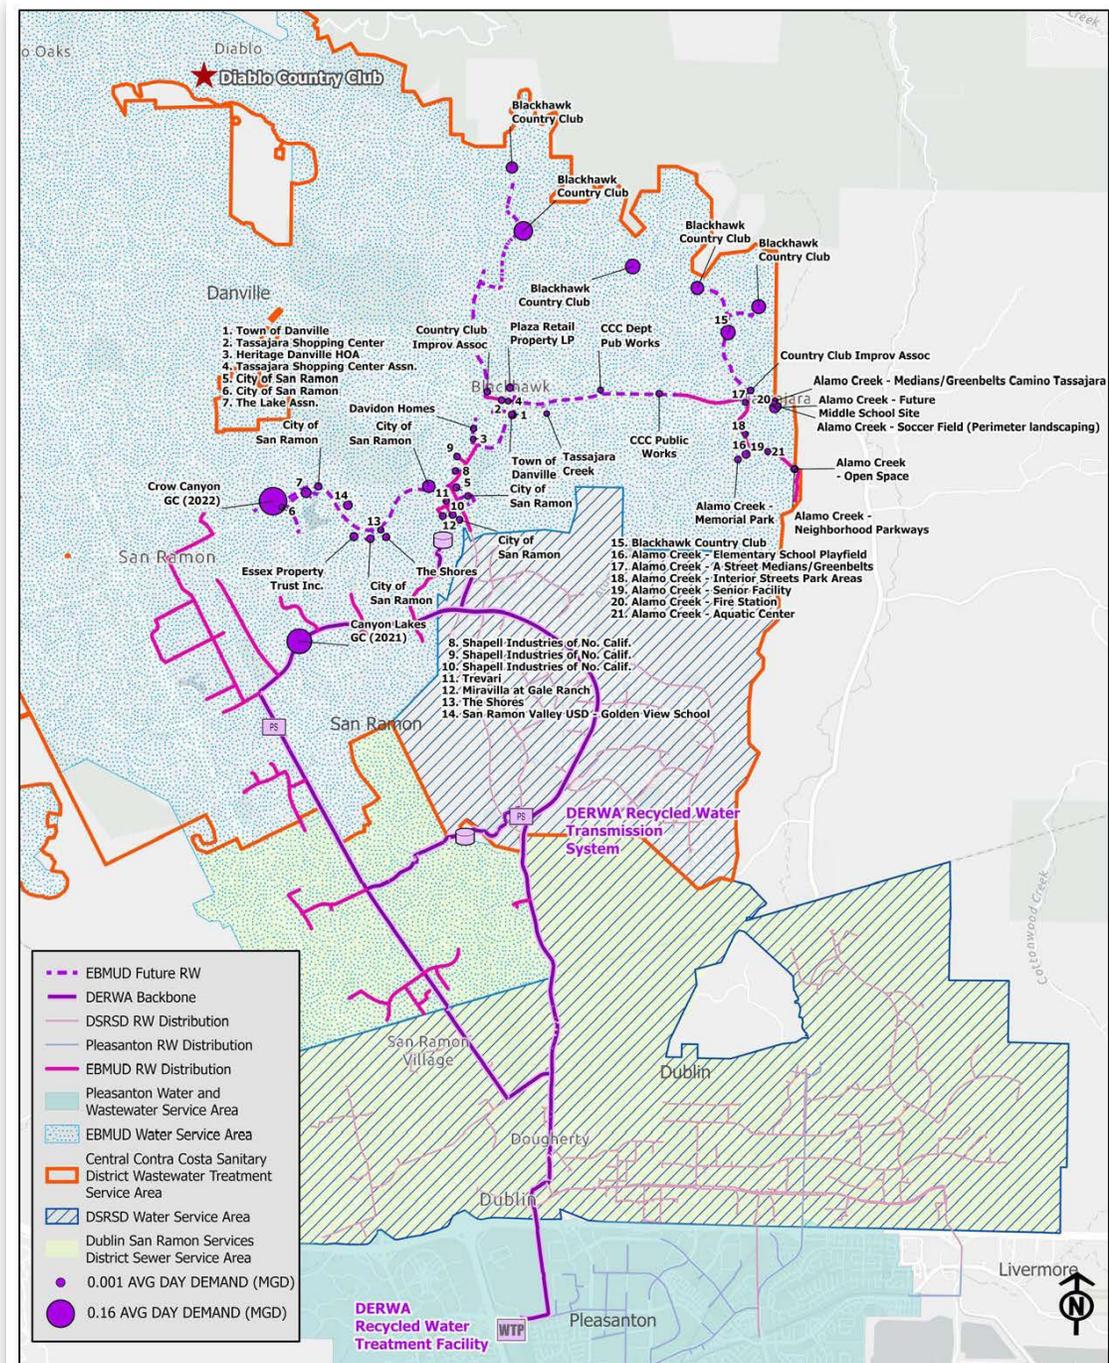

- Improve water resiliency for the region
- Expand recycled water system to reach new customers
- Reduce nutrient discharges to San Francisco Bay

# Diverting wastewater from Central San (2.7 mgd, June-Aug) would enable DERWA to expand its customer base and meet demands for next ten years

# Multi-agency effort to develop and implement long-term agreement

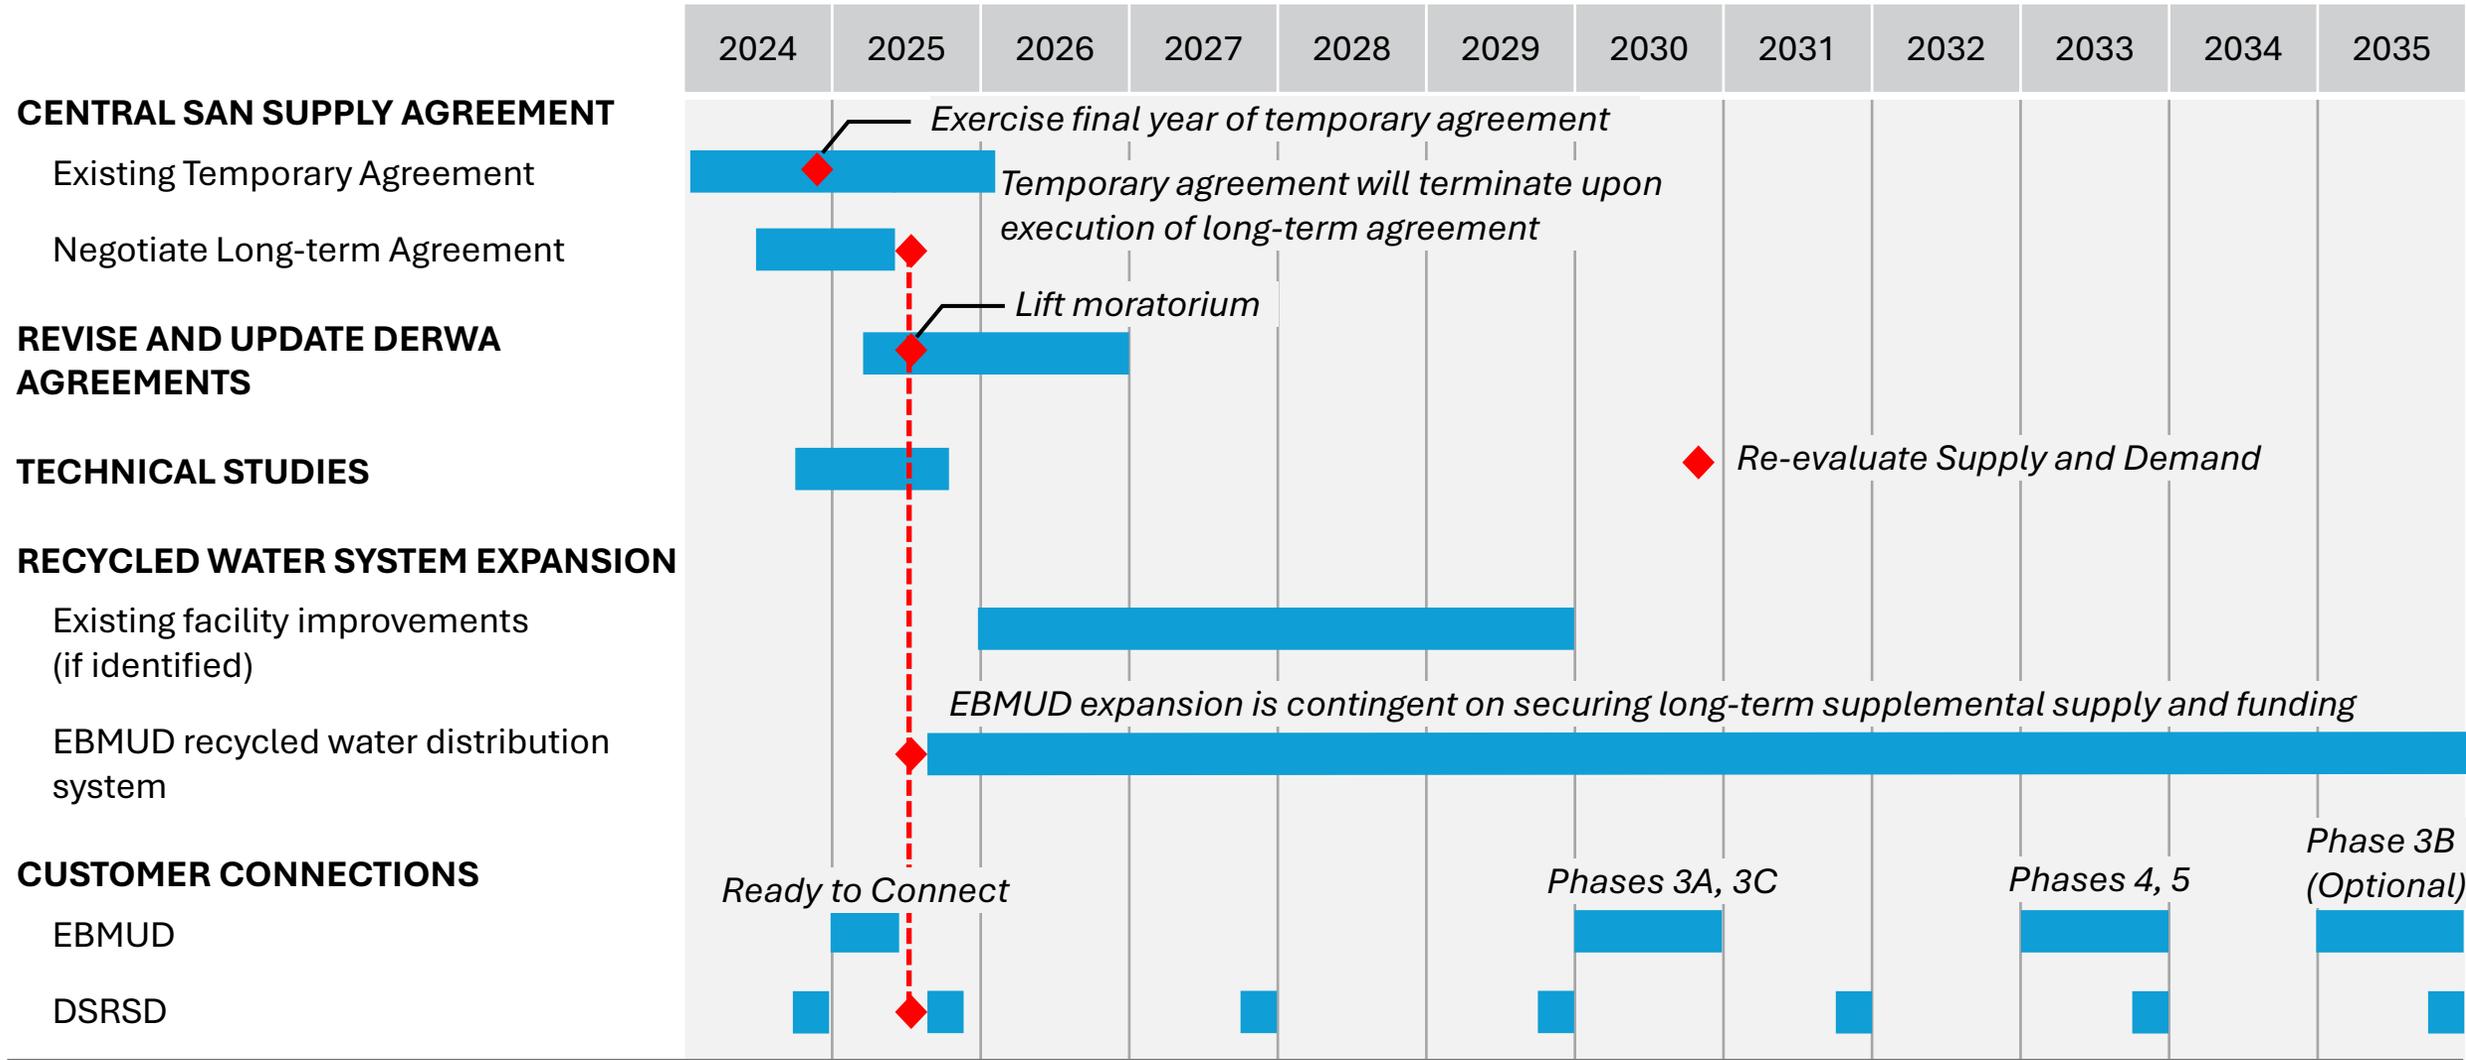

- Negotiate agreements
- Conduct technical studies
- Expand recycled water infrastructure
- Connect new customers

**DERWA Recycled Water Service Areas**

# Schedule

◆ KEY DECISION POINT

# NEXT STEPS

- Exercise final year of temporary DERWA-Central San agreement through 2025
- Initiate technical studies
- Develop and execute long-term agreement with Central San
